### Teaching Goals: My goals as a teacher are:

1. To help the student achieve their maximum potential as a musician.
2. To give the student the skills and background that will allow them to have a life long relationship and love of music.
3. To make each lesson a positive experience that equips the student to work productively and minimize frustration during their independent practice time.
4. To model and encourage musical excellence, and the development of character traits such as persistence, problem solving, and goal setting that will support excellence and enjoyment of future endeavors.
